
1) This map does not represent the results of an "on the ground survey" performed by Halff Associates, Inc. and is only a graphic representation of the current Town boundaries. City maps utilize various techniques including GIS and State Plane coordinates as well as metes and bounds descriptions. Descriptions from the original Town formation documents and subsequent annexations as well as joint agreements with neighboring cities were used as sources to create this map. All mapping changes are carefully compared to previous versions to insure uniformity and completeness but this map is not intended to be used to settle disputes. (See #3 below).
2) Statements made on some surveyed, platted subdivisions in Annetta or the Town's Extra Territorial Jurisdiction were created by third parties and do not necessarily represent factual data even though they may have been subsequently "approved" by county and city officials in the past. Any discrepancies found on these or other tracts of land have been researched by Annetta City Staff and elected officials and when documentation was found to be available, a determination was made as to legal standing.
3) Mapping is an "on-going" process and this product is to be used for planning and general reference only. Disputes over town boundaries can only be resolved by a survey provided by those disputing the Town's claims and only then will the Town determine what actions to take.

OFFICIAL MAP OF THE TOWN OF ANNETTA
ADOPTED: December 17, 2015
